DETAILED ACTION

Specification

1. The disclosure is objected to because of the following: in paragraph [0015], the descriptions of the anti-drainback valve and the relief valve are reversed, e.g. it is the relief valve 40 that includes the first terminal end 42 and the lip 41 not the anti-drain back valve 38. Appropriate correction is required.

Drawings

- 2. The drawings are objected to because of the following:
- They fail to comply with 37 CFR 1.84(p)(5) because they include the following reference signs *not* mentioned in the description: "46" of figure 1.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

Art Unit: 1723

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is indefinite because of the following reasons:
- The following terms lack antecedent basis: "said opposing side"; and
- The respective limitations for the anti-drain back valve and the relief valve are reversed, i.e. it is the relief valve that is arranged between the second aperture and the fluid inlet side and the anti-drain back valve that is arranged between the fluid inlet and outlet sides at the first aperture.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

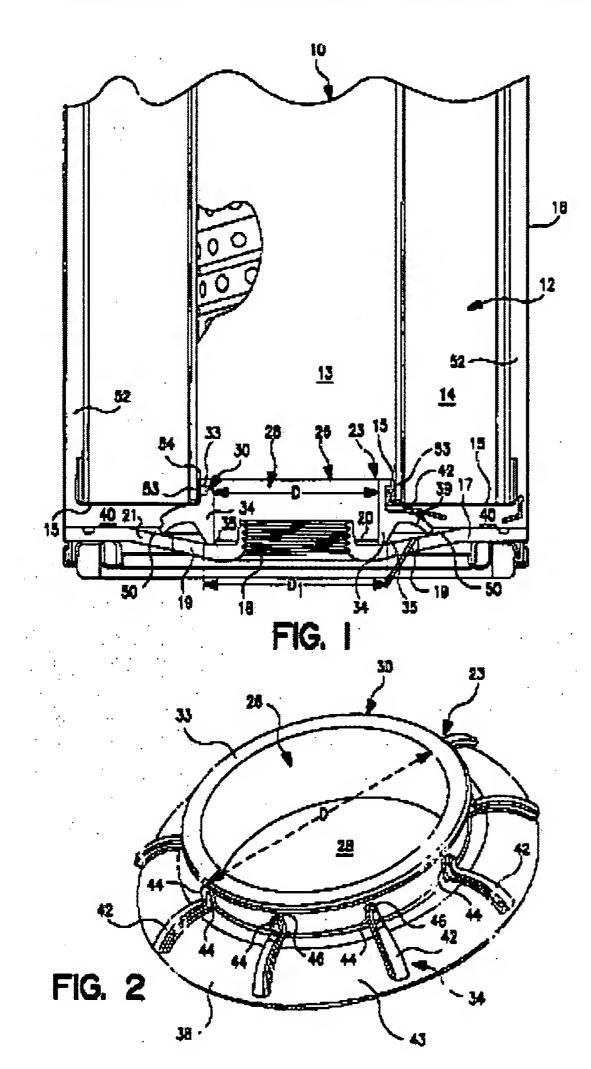

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/645,965

Art Unit: 1723

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-3, 5, and 8-14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by McKenzie (U.S. 6,793,808). McKenzie a fluid filter and valve assembly including a housing

having an end portion 17 including a threaded aperture and a central portion 53, 54 proximate thereto. An elastomeric valve assembly is positioned therebetween and includes an integral relief valve 30 and anti-drain back valve 34. See the drawings and the whole description thereof.

Application/Control Number: 10/645,965

Art Unit: 1723

7. Claims 1-3 and 5-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Buckman (U.S. 3,567,023). Buckman teaches a fluid filter and valve assembly including a having an end portion 10 including a threaded aperture 11 and inlets 16 and a central portion 30 proximate thereto. An elastomeric valve assembly (figure 7) is positioned therebetween and includes an integral relief valve 24 and anti-drain back valve 20. The U-shaped recess 35 is also taught. See the drawings and the whole description thereof.

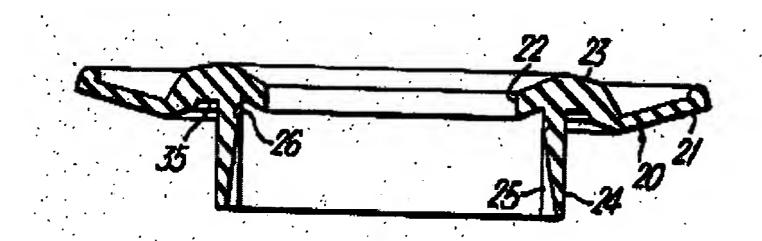

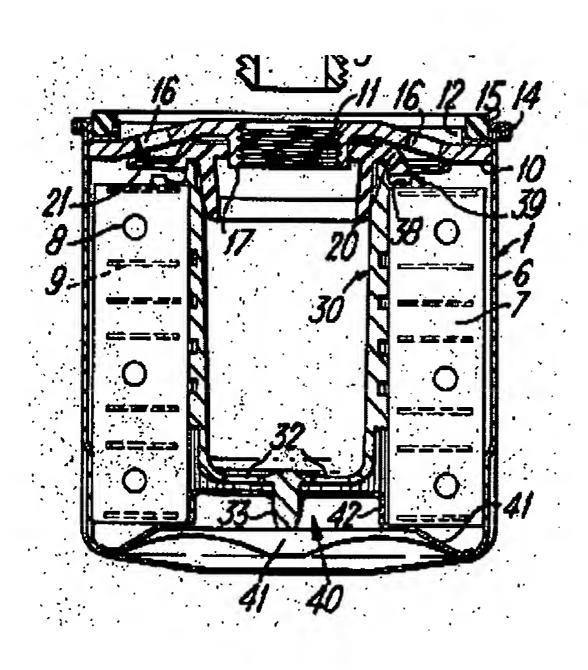

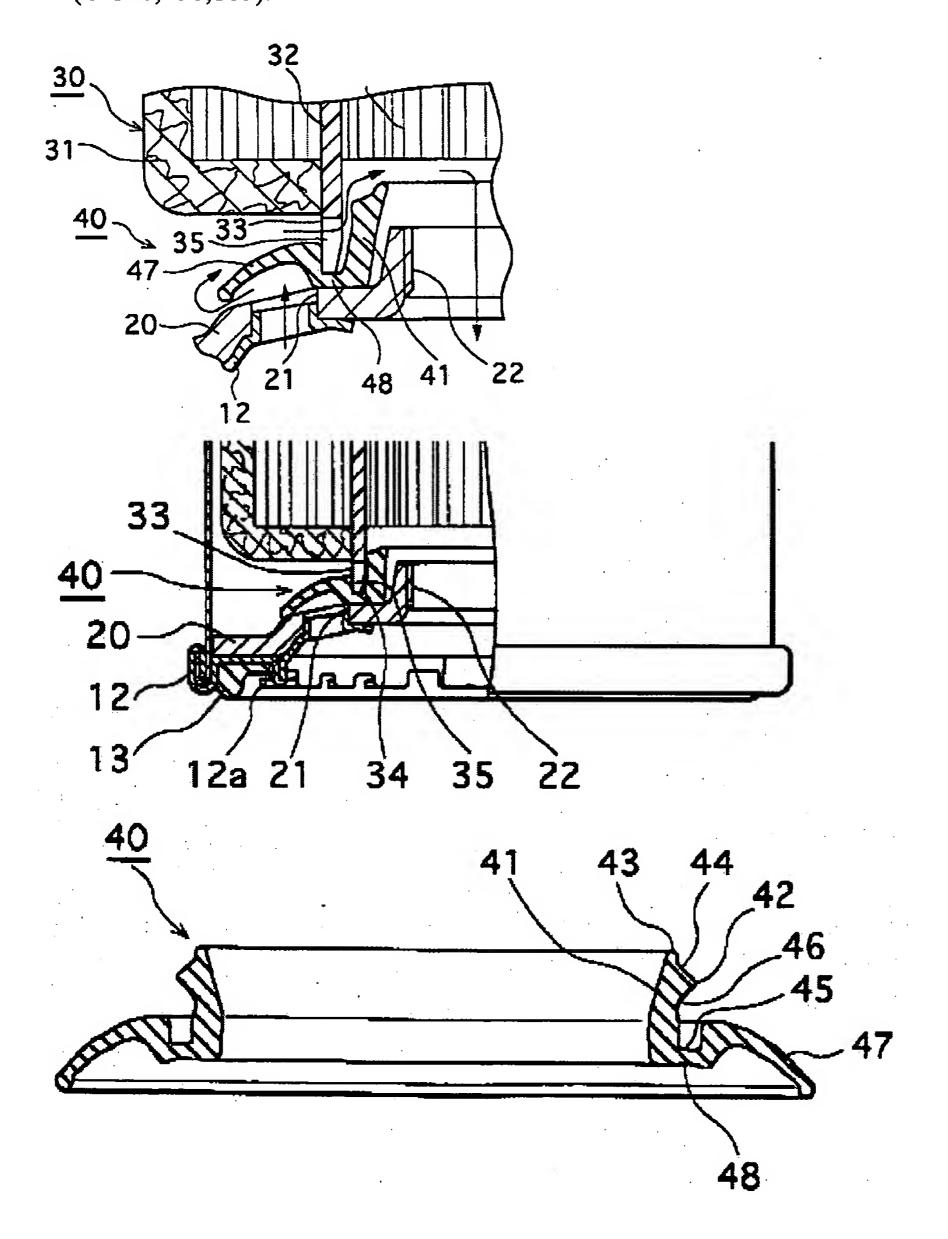

FIGURE 7

Art Unit: 1723

8. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Suzuki et al. (U.S. 6,136,183).

9. Contact Information:

• Examiner Mr. Terry K. Cecil can be reached at (571) 272-1138 at the Carlisle campus in

Alexandria, Virginia for any inquiries concerning this communication or earlier

communications from the examiner. Note that the examiner is on the increased flextime

schedule but can normally be found in the office during the hours of 8:30a to 4:30p, on at

least four days during the week M-F.

• Wanda Walker, the examiner's supervisor, can be reached at (571) 272-1151 if attempts to

reach the examiner are unsuccessful.

• The Fax number for this art unit for official faxes is (571) 273-8300.

• Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status information

for unpublished applications is available through Private PAIR only. For more information

about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access

to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197

(toll-free).
